# WITHOUT YOUR SUPPORT THERE IS NO CURE

Blood cancer doesn't discriminate. When Johnny was diagnosed, he was busy working and watching his two young sons grow up. After other treatments failed, his life hung in the balance - a stem cell transplant was the only thing that could save his life.

Anthony Nolan found the stem cell donor for Johnny that cured his cancer. Now he can carry on being a husband, friend and father.

Every day we give three people like Johnny a second chance of life.

**But right now, we can't find a match for every person who needs one - which is why your support is so urgently needed.**

## SIGN UP TO PAYROLL GIVING

Signing up to payroll giving today is a simple, tax-efficient way to make regular donations straight from your pay. And it could save the lives of blood cancer patients in desperate need.
