

saving the lives
of people with
blood cancer

To Whom It May Concern

Please note that this patient has had a stem cell transplant and is at high risk of neutropenic sepsis.

Even in the current COVID-19 pandemic, neutropenic sepsis should still be considered as a matter of urgency. Please can you ensure that if presenting febrile, the patient also has urgent blood tests taken including a full septic screen. They may require an initial dose of intravenous antibiotics within the hour as per your local neutropenic sepsis policy.

If you require further information, please can you contact their keyworker at
who will advise on their level of risk and action that needs to be taken. For
out of hours please contact the main switchboard and speak to the on call Haematology register.

Best wishes

Dr Robert Danby
