

ANTHONY NOLAN

Saving lives through stem cells

Anthony Nolan saves and improves the lives of people with blood cancer and blood disorders.

We need you

YOU might be the only person who could save someone's life.

For someone with blood cancer, a stem cell transplant from an amazing stranger might be their only hope. But finding the right match is hard.

If you're aged 16–30, YOU could be the answer by joining the stem cell register.

It's free, quick and easy and you might just save a life.
