

Saving lives through stem cells

**“Miles wouldn’t have made it to the age of five without a transplant”**

HELEN, WHOSE SON MILES

WAS BORN WITH A RARE BLOOD CONDITION

# With your support more patients like Miles can find their lifesaving match

**When Miles was born, doctors immediately knew something was wrong. He was diagnosed with Wiskott–Aldrich syndrome – the same condition Anthony Nolan had. Like Anthony, he needed a stem cell transplant to survive.**

Thankfully, a perfect match was found on our register, and Miles had his transplant at just one year old. He's now a busy, happy little boy who loves spending time with friends and family. In a heartwarming twist, his donor – who works at the same place as Miles's dad – has become his godfather. His mum Helen said: "He's so humble about it but to us he saved Miles's life, and I don't know how we're ever going to thank him enough."

There are so many patients waiting to find their lifesaving match just like Miles. Your support can help us transform their futures too.
