

DO YOU KNOW THE LATE EFFECTS OF A STEM CELL TRANSPLANT?

The long-term effects of a stem cell transplant can have a very serious impact on health and well-being. Common late effects include:

That means a transplant patient is a patient for life. At Anthony Nolan we're here to help you be there for your patients.

*GvHD - cells from the donor attack the patient's body. Symptoms can range from mild skin, gut and joint problems to serious and life-threatening complications.

A TRANSPLANT PATIENT IS A PATIENT FOR LIFE

Before, during and after stem cell transplant, at Anthony Nolan we're here to help you be there for your patients.

For free expert resources and information about long-term effects, please visit www.anthonynolan.org/healthcare
