CHAIRMAN AND CHIEF EXECUTIVE'S STATEMENT

The past 18 months have been the most successful in our recent history.

It seems that we always begin our report like this. But then it is always true. Every year we have done more, broken new ground, saved even more lives. And the last year and a half was no exception.

We launched a new cord centre in Birmingham, so we could collect more precious cord blood. Our chief medical officer, Dr Bronwen Shaw, uncovered the hidden role of an additional allele, an alternative form of a gene, which sheds new light on transplant outcomes. And we extended our Graft Identification Advisory Service to advise more transplant centres on donor selection.

It was achievements like these that led The Charity Times to name Anthony Nolan as their charity of the year. We were honoured. But our job continues until we save the life of everyone who needs a stem cell transplant.

And we are making headway as, for the first time in our history, we facilitated more than 1,000 stem cell transplants in a single year.

When Shirley Nolan opened the doors to our register's first home – the basement of Westminster Children's Hospital – she could never have imagined such a landmark but it is testament to the strength of Shirley's vision that we have.

In keeping with that vision, we launched our new strategy to achieve an ambitious aim – to save the life of everyone who needs a stem cell transplant and, as you will discover, we are already making good progress.

We are extremely proud of what we have achieved this year. And we know we could not have done it without our incredible supporters, the doctors, nurses and scientists we work with in hospitals, our partners in the NHSBT, the patients who have shared their stories and inspired our work, the selfless donors, mothers and, of course, our wonderful staff and volunteers.

So here is to the next 1,000 transplants, the next 1,000 chances to live, the next milestones. With their support, we will get there.

Chairman, Simon Dyson, MBE

Chief Executive, Henny Braund

1,621 POTENTIAL DONORS JOINED OUR REGISTER IN A SINGLE DAY, INSPIRED BY BETHANY MICKLEBURGH'S APPEAL

The size of our register

WHY WE'RE HERE

Anthony Nolan exists to help save the lives of people with blood cancer who need a blood stem cell or bone marrow transplant.

Our objectives are to:

- provide relief, treatment or cures for people with blood cancer or similar immunological deficiencies, diseases or conditions
- provide information to help people with blood cancer
- carry out research into the causes, diagnosis and treatment of blood cancer
- advance research into improving blood stem cell transplantation and to publish the useful results of such research.

How we'll do even more

We always know that we can do more. That is why we launched an ambitious new strategic plan, all under one vision:

To save the lives of everyone who needs a stem cell transplant

To make sure we achieve and realise our vision, we set ourselves four strategic aims:

- Find a donor for every patient who needs one
- Improve the quality of life of patients who have had a transplant
- Put customers in the transplant community at the heart of what we do
- Provide the right people, environment and funding to maximise our impact

How will we do this? In broad terms, we will

- ensure patients get the best possible match, survive the transplant and have a good quality of life, post-transplant
- serve our customers in the transplant centres and hospitals, making sure we provide them with the right match for the right patient at the right time
- carry out research that helps patients in areas such as matching, tissue typing and post-transplant treatment
- harness the power of our supporters to raise funds and to spread the word about our lifesaving work
- recruit donors and support all those who go through the donation process
- work with partners on policy, research and campaigning to drive innovation and improve the lives of patients

We know these are ambitious aims. But we have already begun to achieve them.

THE STORY SO FAR

It has been only a year since we set out the new Anthony Nolan vision, and the four ways we will realise it. But we are already making good progress.

AIM 1

Find a donor for every patient who needs one

Right now, almost 1,600 people in the UK – 37,000 worldwide – are waiting for that vital match.

Over the past 18 months, we have worked hard to change that statistic:

- We recruited 71,328 new potential donors, anyone of whom could save the life of someone with blood cancer. These signed up in huge numbers online and at each of the 707 events that took place.
- We held our biggest ever recruitment event. An appeal for 14-year-old Bethany Mickleburgh, held at the Leicester Tigers stadium, resulted in 1,621 new potential lifesavers.
- Marrow, our 39-strong network of student groups, broke records yet again, signing up an astonishing 17,777 potential lifesavers across 414 events.
- We facilitated 1,736 potentially lifesaving transplants¹.
- We know younger people are the most likely to be chosen by transplant centres to donate. So we lowered our joining age from 18–40 to 16–30, becoming the first register in the world to recruit 16-year-olds. Since then we have seen 1,821 16-year-olds join our register, and 2,798 17-year-olds.

- We also know that young men are more likely to be called upon to save a life. So we launched a hugely successful integrated campaign, featuring radio and online adverts as well as posters and locations across the UK, to make them aware of the incredible difference they could make.

- We collected 8,261 cord blood units, and banked 1,698, ready to be called upon to save a life. By the end of the period, we had shipped 14 units to be used in potentially lifesaving transplants.

- As part of our strategy to save the lives of more people of black, Asian and minority ethnic backgrounds (BAME), in July 2012 we launched a new cord collection centre at Birmingham Women's Hospital. We chose this area because of its diversity, and the centre brought our total number to five.

- We continued our project to create a genotype prediction algorithm, an equation to discover whether a potential donor is a good match using only the information gathered through initial testing.

- And we began developing a specific algorithm for BAME donors, starting with Asian Indians.

- In order to assist our work in creating the prediction algorithm, we launched The Six Percent campaign to find more Asian donors. The campaign resulted in 2,025 potential lifesavers joining our register².

- Through our pioneering education scheme Register and Be a Lifesaver, we taught 53,014 young people aged 16–18 about the life-changing difference they can make by donating their stem cells.

AIM 2

Improve the quality of life of patients who have had a transplant

Currently, 50% of patients die within two years of their transplant, while 40% of those who survive do so with chronic graft-versus-host disease (GvHD).

This needs to change, and we are taking action:

- Our Research Institute is fully dedicated to improving the outcome of bone marrow transplants. In the past 18 months we have published over 50 research papers on a range of transplant and patient issues – from the merits of mismatching through to the interaction between natural killer cells and regulatory T cells.

- We conducted research into what information patients need. And we set up a 'patient panel' – a group of people who are pre- and post-transplant and willing to give us feedback on our planned work with patients. There are currently 15 people on our panel, which will continue to develop over time.

- We formed a new Patient Experience team dedicated to making sure patients and their families have the information and support they need when having a transplant.

- We produced The Next Steps, a handbook for long-term recovery after stem cell transplant. Written by transplant nurse Michelle Kenyon and consultant Dr Bronwen Shaw, the book will fill a vital gap in the information available for patients after they have received a transplant.

- The Policy and Public Affairs team has now turned its attention to influencing government and NHS policy to the benefit of transplant patients. To that end, later this year we intend to launch Anthony Nolan's very first public policy campaign, which will focus on achieving improved provision for post-transplant care.

AIM 3

Put our customers – transplant centres, clinicians – at the heart of what we do

We know that in order to provide the best possible service for hospitals and their patients, we must understand their needs and ensure that they are met.

And here is how we have been making sure we provide a first-class service:

- We reduced the length of time taken to contact matching donors to provide blood samples so that the match can be confirmed. In 2010 the average time for this process was 22 days; in 2012 it was 12 days – a 45% reduction.

- We worked closely with key clinicians, hosting events such as the Customer Forum in October 2012 and the Graft Selection Strategy Workshop in February 2013. We plan to continue being at the centre of the transplant community, working with clinicians to discover how we can save even more lives together.

- We continued our project to create a genotype prediction algorithm, an equation to discover whether a potential donor is a good match using only the information gathered through initial testing.

- We continued our Graft Identification Advisory Service (GIAS) to advise transplant centres on donor and cord blood unit selection, and extended it to include another two centres – seven in total. This has made the process of requesting a donor, through to transplanting the cells, much quicker – saving time patients may not have had.

- In the past 18 months our HLA typing laboratories began typing for all six major HLA genes, and donors are now being selected for patients using a bioinformatics tool developed within our Research Institute. More recently, research conducted by our scientists Dr Shaw, Professor Marsh and Professor Madrigal has highlighted the importance of the sixth gene, known as HLA-DPB1. A number of transplant centres in the UK are already using HLA-DPB1 as part of their donor selection strategy.

AIM 4

Provide the right people, environment and funding to maximise our impact

We also know that to save as many lives as possible, we must have the best staff, the right environment and the necessary resources.

And we have been working hard to make these happen:

- We improved our previous rating and achieved 'One to Watch' rating in the best places to work survey³.

- Voluntary fundraising income had a successful 2011/13 period. Net fundraising income was £3.75m compared to £3.22m in 2010/11.

- Our fundraising strategy now focuses on growing and diversifying Anthony Nolan's voluntary funding base. This is to provide increased and sustainable income to deliver our vision of saving the life of everyone who needs a stem cell transplant.

- We continued to invest in regular giving from individual supporters, and this income stream saw significant growth. By the end of 2011/13 we had 30,000 regular givers (up from 15,000 at the end of 2010/11), whose committed and generous support enabled us to plan with confidence for the future.

- The period also saw strong legacy income performance, with a total of £1.1m compared with £407,000 in 2010/11. Bequests such as these are vital to enable Anthony Nolan to continue and expand our lifesaving work.

- In December 2012 Anthony Nolan was one of six charities chosen by ITV to benefit from Text Santa, their Christmas fundraiser. This exciting partnership raised over £900,000 for our work. It also increased our profile as Anthony Nolan was featured across a range of ITV programmes and on the main Text Santa programme on 21 December. This additional coverage led to our website receiving eight times the normal daily traffic and over 2,800 people joining our register during the Text Santa week. We are hugely grateful to ITV for their support and for helping save lives.

- We continued to receive fantastic support from our event participants. More than 1,400 people ran, cycled, trekked or parachuted for Anthony Nolan in 2011/13, raising over £1.5m.

¹AN donors & cord (UK and overseas patients) 625
NHSBT donors & cord (UK patients only) 190
Imported donor & cord 921
Total 1736

²The campaign ran from October 2012- June 2013. In this period 1383 Indian donors were recruited. In addition to this 642 other South Asians were recruited.

³ In October 2011, we took part in the Best Companies 2012 survey with a response rate of 86%. Our overall score was 653.5, which was 16.6 points up on the previous year and only six points off 'One Star' status meaning that we achieved One to Watch again.

- We were delighted to be selected as the official charity of the 2014 Virgin Money London Marathon. We expect to have a team of more than 800 runners raising over £1m to fund the recruitment of a further 10,000 young men to our register.

- More than 800 individuals and groups in the community raised over £1m by doing street collections, cake sales at work, holding quiz nights and being sponsored to do the things they love. We worked closely with a number of patients and their families, helping them to raise funds and awareness and recruit stem cell donors. The family and friends of Ayesha Siddiqui, an eight-year-old from Glasgow who needs a stem cell transplant, have raised over £176,000 to date and recruited 478 people to the stem cell register.

- We continued to benefit from the generous support of charitable trusts and foundations. Grants and donations included a three-year grant of over £600,000 from the Sue Harris Trust to open the Sue Harris Cord Blood Collection Centre at the Royal Free Hospital, London; £135,000 from the Garfield Weston Foundation towards vital new equipment for our tissue typing laboratories; £80,000 from the Jack Petchey Foundation to enable us to recruit more young people in London to our register; and £59,000 from the UK Stem Cell Foundation for clinical trials.

- Our work would not be possible without our amazing volunteers, either. Over the past 18 months we have worked with more than 700 donor recruitment volunteers.

Over 130 Register and Be a Lifesaver (R&Be) volunteers helped us speak to 51,153 students. Around 600 incredible Marrow volunteers have smashed all records. Over 100 dedicated Friends group members and 90 tea court volunteers across the UK have spread the word and raised funds. And no transplant could happen without our 39 volunteer stem cell couriers and 11 donor visitors.

- Anthony Nolan could not give the chance of life to people with blood cancer without the generosity and commitment of all our supporters. We are enormously grateful to them for all their help. It costs £100 to add each person to our register. With more funds we can save more lives.

WE SUPPLIED OUR FIRST EVER CORD BLOOD UNIT FOR TRANSPLANT

4 3 8 0 4 8
The size of our register

³ In October 2011, we took part in the Best Companies 2012 survey with a response rate of 86%. Our overall score was 653.5, which was 16.6 points up on the previous year and only six points off 'One Star' status meaning that we achieved One to Watch again.

WHERE WE'RE GOING AND HOW WE'LL GET THERE

As you can see, we have made good progress to realising our vision of saving the lives of everyone who needs a stem cell transplant. But we know there is still a long way to go. So we have drawn up a plan to make sure we get there.

- We are evaluating the longer term requirements for our laboratory space, and the equipment we will need to buy, to enhance our capacity to process a larger number of first-time donors.
- The aim is to dramatically increase the volume that we can process, which will mean more lives will be saved using donors from the UK. This is particularly important since spending budgets for UK health authorities are being squeezed. By using more UK-sourced donors, we can help reduce costs for the NHS and make sure more transplants take place for the same amount of money.
- We are also increasing the number of hospitals where we collect cord blood. These are expensive to maintain, so Anthony Nolan is bidding for funds that will allow us to expand at a faster rate.
- The success of our fundraising activities in the last 18 months has already generated impressive growth. And being selected to be the official charity for the 2014 Virgin Money London Marathon in our 40th anniversary year will help deliver a higher number of stem cell donors to our register.
- We have enjoyed a strong and successful partnership with NHS Blood and Transplant. And we aim to extend our

cooperation with other donor registers in the UK to offer a single point of contact for all UK hospitals.

- Our funding has been helped by the Department of Health, both to process first-time donors and extend the hours that we collect cord blood in some hospitals. We are entering the third year of a funding relationship to support our cord provision. And we are aiming to continue the level of support for donor processing that was offered in the past.
- As we have increased the scope of our work and the different ways the public can get involved, we have examined the way we communicate with them. This has led us to redesign our website which we hope will lead to an increase in people joining our register and fundraising.
- In May 2014, we will host the World Marrow Donor Association (WMDA) International Donor Registry Conference in London. This will increase our standing within the worldwide stem cell community, and we will continue this with the development of our international strategy.
- In February 2013, our Research division secured funding for their T-Control project, a consortium between Germany, the Netherlands and the UK. Anthony Nolan will receive €1,200,000 of the €6,000,000 allocated to the project. The project will last three years and its aim is to treat transplant patients with a cellular product to fight infection, relapse or GvHD (graft-versus-host disease).

In particular it will enable us to translate research to the clinic by being able to perform a clinical trial to modulate GvHD using cord blood regulatory T cells.

The range of activities we are planning for the future is designed to focus on helping more patients secure lifesaving transplants and giving a larger number of people worldwide the chance of life. And to one day realise our vision - *to save the life of everyone who needs a stem cell transplant.*

THE FINANCIAL REVIEW

Since the last annual report, the Trustees decided to change the year-end to March from September to align with suppliers and customers. This set of financial statements shows the results of the 18 months to March 2013 and all comparisons are between the 18 months and 12 months periods.

During this 18-month period, Anthony Nolan's income has risen to £58m (from £32m in a 12 month period). The main reason behind this is the increased number of transplants being carried out both worldwide and in the UK as demand for stem cells from unrelated donors has grown. Income from the provision of donors has risen by £22m, representing an annualised growth of 28%. The source of the donors has broadened through this period. Increasingly, donors have been drawn from the largest registers of the world – Germany and USA – but Anthony Nolan now includes the income derived from donors supplied by the National Health Service Blood & Transplant (NHSBT). The agreement between Anthony Nolan and NHSBT started in January 2012 and allowed for NHSBT donors to be accessed via Anthony Nolan. This has helped increase the donor provision income by £1.9m since January 2012.

The fundraising income also grew despite difficult market conditions and against sector trends. Overall net voluntary income grew to £4.3m. We continued to invest in Individual Giving, and there are now over 30,000 supporters providing a steady stream of income from this activity.

The cost base for the organisation has benefited from a series of reviews of

supplier costs. The increase in the number of transplants facilitated has seen the surplus rise above £3m, and total reserves to £8.6m. The Board of Trustees' plan for future years provided for a higher resolution level of testing to be carried out on newly recruited donors, and this will lead to a significant cost increase to tissue type these donors. However, the benefit for patients from the higher resolution tissue typing is that we would expect to provide a greater number of UK-sourced donors at a faster rate. This will help us to find a match for patients more quickly than before and we anticipate this will save more lives. The Trustees therefore designated a large part of the surplus to cover the higher costs of donor typing for the next year. This has been excluded from our reserve cover as we expect most of this to be spent in the coming year.

Cash flow is an important component in financial planning for Anthony Nolan. We have worked closely with hospitals and overseas registers to provide more information to them faster and to ensure that the payment process can be as smooth as possible. This has helped our key customers understand the need for prompt payment as the cash balances are required to help finance the growth in Anthony Nolan's activity. During this period, the cash levels have increased from £3.1m to £5.4m. This is largely as a result of the better trading position but also by maintaining a close control over the level of our debtors.

Donor provision costs have increased in line with the higher volume of transplant activity. In addition, our activity relating to the collection of cords has increased arising from the additional funding from the

Department of Health as well as investment of Anthony Nolan's own resources. Together these areas have increased the base costs of donor-related work shown in the Statement of Financial Activities. Our other main charitable activities have also increased because we are spending more on education and awareness through support for patients as part of our refreshed strategy. Our research costs have remained more in line with previous year's expenditure, but these are expected to rise in the coming years as we have been funded by the European Union for a three-year project on T cell research.

Our governance costs have increased during the period as we spent time and money on developing our new strategy. Overall our support costs, which help all areas of our work, have fallen from 14% of income to 12% of income, reflecting the cost efficiencies we have made during this period.

Our investment in new equipment includes our plans for improving our core IT systems. We are progressing with major IT developments which will improve access to our register and speed up the time taken to search for potential donors. This has taken longer than expected as we make significant improvements to our key system.

The establishment of the Cell Therapy Centre in Nottingham in 2008 marked the start of the project to provide cords from hospitals in the UK via Anthony Nolan. During the last 18 months, the number of clinical cords increased to over 1,500 and the first cord units were supplied.

Reserves Policy

Anthony Nolan's policy with regard to reserves is to make suitable investment in the on-going development of the charity, while maintaining adequate funds to deal with current and medium-term needs and having the necessary provision to deal with unforeseen circumstances. Free reserves at the year-end, excluding fixed assets, designated funds and restricted funds, amounted to £4.1m compared with £3.0m the previous year.

Anthony Nolan has undertaken a review so that our Trustees can determine what should be the current optimal level for such reserves. The Board decided that Anthony Nolan's free reserves should increase to £6m in order to deal with the following risks:

- Requirements for a reasonable level of working capital, taking into account our growth.
- Period of time required to downsize the charity operations if necessary to respond to:
 - likelihood of a downturn in income streams
 - risk in reduction of demand for donors
 - period of time required to re-establish income streams.

The Trustees have plans in place to deliver surpluses over the coming years to reach the desired level of reserves. The appropriate level of reserves of the charity will be reviewed regularly.

Grant-Making Policy

Anthony Nolan does not currently give grants as a method of furthering its charitable activities.

Investments Policy

Anthony Nolan's free reserves, at a level of approximately one month's income, means that it is currently inappropriate to allocate funds to long-term, non-cash based investments. As a result, reserves are held as cash in interest-bearing deposit accounts. It is Anthony Nolan's policy when gifted shares to convert such holdings to cash as soon as is practical. This policy will be reviewed if it became apparent the funds could prudently be set aside for longer-term strategic investments. During the 18 month period, Anthony Nolan's assets generated total investment income of £148k (12 months to 30 September 2011: £86k). In addition, the profit made by the commercial trading operations of Anthony Nolan Trading Limited amounted to £185k (12 months to 30 September 2011: £66k), of which £128k (£66k) was remitted to Anthony Nolan by way of Gift Aid transfer.

HOW WE OPERATE

ORGANISATIONAL STRUCTURE

Anthony Nolan is a registered charity, and a company limited by guarantee, not having a share capital. Every member undertakes to contribute an amount not exceeding £1 to the assets of the charity in the event of the charity being wound-up during the period of their membership, or within one year thereafter. The members are the Trustees and Directors of the charity.

The overall strategic direction of the charity is determined by the Trustees, who meet formally at least four times each year. The Trustees are responsible for planning and policy-making for Anthony Nolan and, accordingly, all key decisions are referred to and taken by the Board of Trustees.

The day-to-day management of Anthony Nolan is entrusted to the Chief Executive and the senior management team, who have delegated authority from the Board to administer the affairs of the charity. The Chief Executive and senior management team are invited to the Trustees' meetings, and provide them with regular reports on the work of Anthony Nolan.

The Trustees have taken the Charity Commission's general guidance on public benefit (contained within the guidance publication Charities and Public Benefit) and specific guidance on public benefit (contained within the guidance publication Public Benefit and Fee-Charging) into consideration in preparing their statements on public benefit contained with this Trustees' annual report.

Senior Management Team

Anthony Nolan's senior management team meets on a regular basis, and departmental meetings are held throughout the year.

Sub-Committees

An Audit Committee, chaired by Ian Krieger, is a formal sub-committee of the Board of Trustees. The Chief Executive and the Finance & Resources Director are invited to attend the meetings.

Anthony Nolan Trading Limited

The charity owns 100% of the issued share capital of Anthony Nolan Trading Limited (ANT). This subsidiary plays a crucial role in fundraising on behalf of the charity, and indeed the principal activity of ANT is to carry on the trading operations of the group with a view to raising funds. This is achieved through advertising, selling merchandise, fundraising events, and exploiting intellectual and similar rights held by the parent charity.

RECRUITMENT, APPOINTMENT, ELECTION, INDUCTION AND TRAINING OF TRUSTEES

Recruitment And Appointment

Appointment to the Board of Trustees is by invitation after the needs of the charity and the range of suitable candidates are considered by the Trustees.

The number of Trustees is not subject to a maximum, but must be three or greater.

Election

The Trustees retire from the Board by rotation every three years with the option of re-election. The Trustees aim to ensure that the composition of the Board contains individuals with suitable backgrounds and experience to contribute positively to the governance of Anthony Nolan.

Since the members of Anthony Nolan are the Trustees and Directors, election and re-election is determined by the current Board in all cases.

Induction And Training

The work of Anthony Nolan involves continuously advancing scientific and medical processes of stem cell transplants. To keep Trustees aware of the charity's operations on both a national and international level, sessions are arranged to update them on facets of Anthony Nolan's work, either during Trustees' meetings or away days. Presentations by outside advisers relating to specific governance issues are organised as appropriate. The induction of a new Trustee is tailored to the individual concerned. It does, however, always include the provision of key documents and information relating to Anthony Nolan, a guided tour of the charity's operations, an introduction to key staff, and an outline of the duties, responsibilities and obligations of being a trustee and director.

Declaration Of Interests

Each financial year, all Trustees complete a Declaration of Interests form and new Trustees complete a Fit & Proper Person Declaration, as recommended by HMRC. The Declaration of Interests registers are included in the year end examination by our auditors.

Professional Indemnity Insurance

The charity has taken out an insurance policy that provides professional indemnity insurance cover for the Trustees. The cost of this insurance for the period was £2,166 (2011: £1,983).

TONI MOORE DONATED HER BONE MARROW JUST MONTHS AFTER HER UNCLE DIED OF LEUKAEMIA

4 4 4 7 9 9
The size of our register

Risk And Corporate Governance Matters

The Trustees have made an assessment of the risks to which Anthony Nolan is exposed, especially those related to business, operations and finance. They have put in place a review and reporting procedure to manage and reduce those identified risks. The two key risks faced by Anthony Nolan are the potential inability to balance fundraising income with charitable needs, and not being able to recruit and make available future candidates for stem cell collection.

Procedures are in place to review risks on a regular basis. The actions that might need to be taken have also been considered and are monitored and formally reassessed by the Trustees annually.

Trustees' And Directors' Responsibilities In The Preparation Of Financial Statements

The Trustees (who are also the directors of Anthony Nolan for the purposes of company law) are responsible for preparing the Trustees' annual report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

Company law requires the Trustees to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the charitable company and the group as at the balance sheet date, and of the incoming resources and application of resources, including the income and expenditure for the charitable group, for that period.

In preparing those financial statements, the Trustees are required to:

- select suitable accounting policies and then apply them consistently
- observe the methods and principles in the Charities SORP
- make judgements and estimates that are reasonable and prudent
- state whether the applicable UK Accounting Standards have been followed subject to any material departures disclosed and explained in the financial statements; and prepare the financial statements on the going concern basis unless it is inappropriate to presume that the charitable company will continue in business.

The Trustees are responsible for keeping proper accounting records, which disclose with reasonable accuracy at any time the financial position of the charitable group, and enable them to ensure that the financial statements comply with the requirements of The Companies Act 2006, The Charities Act 2011, The Charities and Investment (Scotland) Act 2005 and The Charities Accounts (Scotland) Regulations 2006. They are also responsible for safeguarding the assets of the charitable company, and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. The Trustees are responsible for the maintenance and integrity of the corporate and financial information on the charitable company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Auditor

Baker Tilly UK Audit LLP has indicated its willingness to continue in office.

Statement As To Disclosure Of Information To Auditor

The Trustees who were in office on the date of approval of these financial statements have confirmed as far as they are aware, that there is no relevant audit information of which the auditor is unaware. Each of the Trustees have confirmed that they have taken all the steps that they ought to have taken as Trustees in order to make themselves aware of any relevant audit information and to establish that it has been communicated to the auditor.

Funds Held As Custodian

Although the charity maintains restricted funds to deal with incoming resources that are earmarked for a particular purpose by donors, sponsors, and other funds, Anthony Nolan does not currently hold, and the Trustees do not intend that it will in the future hold, any funds as custodian for any third party.

This report was approved by the Trustees and was signed for and on behalf of the Board by

Chairman, Simon Dyson, MBE

OUR FINANCES

INDEPENDENT AUDITOR'S REPORT TO THE TRUSTEES AND MEMBERS OF ANTHONY NOLAN

We have audited the group and parent charitable company's financial statements of Anthony Nolan ("the financial statements") for the period ended 31 March 2013 on pages 12 to 44. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

This report is made exclusively to the members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006, and to the charitable company's trustees, as a body, in accordance with section 44(1)(c) of the Charities and Trustee Investment (Scotland) Act 2005 and regulation 10 of the Charities Accounts (Scotland) Regulations 2006 (as amended) and the Charities Act 2011. Our audit work has been undertaken so that we might state to the members and the charitable company's trustees those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the charitable company, its members as a body, and its trustees as a body, for our audit work, for this report, or for the opinions we have formed.

Respective Responsibilities Of Trustees And Auditor

As explained more fully in the Statement of Trustees' responsibilities set out on page 10 the trustees (who are also the directors of the charitable company for the purposes of company law) are responsible for the preparation of the financial statements and for being satisfied that they give a true and

fair view. We have been appointed auditors under section 44(1)(c) of the Charities and Trustee Investment (Scotland) Act 2005, section 151 of the Charities Act 2011 and under the Companies Act 2006 and report in accordance with regulations made under those Acts.

Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's (APB's) Ethical Standards for Auditors.

Scope of the audit of the financial statements A description of the scope of an audit of financial statements is provided on the APB's website at www.frc.org.uk/apb/scope/private.cfm.

Opinion On Financial Statements

In our opinion the financial statements:

- give a true and fair view of the state of the group's and the parent charitable company's affairs as at 31 March 2013; and of the group's and the parent charitable company's incoming resources and application of resources, including their income and expenditure, for the period then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the Companies Act 2006, the Charities Act 2011, the Charities and Trustee Investment (Scotland) Act 2005 and regulations 6 and 8 of the Charities Accounts (Scotland) Regulations 2006 (as amended).

Opinion On Other Matter Prescribed By The Companies Act 2006

In our opinion the information given in the Trustees' Annual Report for the financial period for which the financial statements are prepared is consistent with the financial statements.

Matters On Which We Are Required To Report By Exception

We have nothing to report in respect of the following matters where the Companies Act 2006, the Charities Act 2011 and the Charities Accounts (Scotland) Regulations 2006 (as amended) requires us to report to you if, in our opinion:

- the parent charitable company has not kept sufficient, proper and adequate accounting records, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent charitable company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of trustees' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

ACCOUNTING POLICIES

Financial statements for the 18 months ended 31 March 2013

Basis Of Accounting

The financial statements have been prepared to comply with current statutory requirements (being the Companies Act 2006, the Charities Act 2011, the Charities and Trustee Investment (Scotland) Act 2005 and the Charities Accounts (Scotland) Regulations 2006), under the historical cost convention, except for investments at market value, and in accordance with United Kingdom Generally Accepted Accounting Practice. The recommendations in Accounting and Reporting by Charities: Statement of Recommended Practice (revised 2005) issued by the Charity Commission in March 2005 have been followed. The accounting policies have been applied consistently in prior years.

Basis Of Consolidation

The consolidated statement of financial activities and the balance sheet consolidate the financial statements of Anthony Nolan and its subsidiary undertaking, Anthony Nolan Trading Limited.

Going Concern

The trustees have reviewed the group's and the parent charity's forecasts and projections covering a period that exceeds twelve months from the date of signing these financial statements, and based on the level of existing cash and estimated levels of income and expenditure, the trustees are satisfied that the charity has adequate resources to continue in operation for the foreseeable future. Accordingly, the going concern basis has been used in preparing these financial statements.

Incoming Resources

All incoming resources are included in the statement of financial activities when the

charity is entitled to the income, and the amount can be quantified with reasonable accuracy. Donations are normally brought into account when received, and are stated gross of any attributable tax recoverable. Government and institutional grants are accounted for on a receivable basis. Donations and grants given for specific purposes are treated as restricted income.

Income from legacies is included in incoming resources on an accruals basis when, for a specific bequest, the three criteria of entitlement, certainty, and measurement can be satisfied and supported by third party confirmation. The charity does not account for legacies subject to a life interest held by another party until the life interest has expired.

Income in respect of payments for bone marrow transplants and other similar services derives from the amounts charged in respect of the search for matching tissue types and the arrangement of the bone marrow transplants, and is accounted for when receivable as incoming resources from charitable activities.

Income from fundraising events, and the associated costs, are included in incoming resources and resources expended following completion of the event. Income received and costs incurred prior to the date of an event are treated as deferred income and prepayments respectively.

All other income, including investment income, is accounted for on a receivable basis as and when earned.

Gifts In Kind

The value of gifts in kind is recognised as income and as a cost where the value exceeds £1,000 on an individual basis and the value can be assessed with reasonable

accuracy. The income is recognised in the SOFA when the gift is sold, which usually takes place at charitable events.

Resources Expended

All expenditure is accounted for on an accruals basis inclusive of any irrecoverable Value Added Tax, and is allocated as direct costs in the statement of financial activities where the costs can be identified as being directly related to generating funds, to a charitable activity, or to governance matters. Where costs cannot be directly attributed, they are allocated to categories on a basis consistent with the budgeted use of the resources concerned and in proportions based upon a suitable ratio applicable to the nature of the cost involved.

Governance Costs

Governance costs consist of an estimate of time spent by senior executives in dealing with governance tasks and any direct costs associated with these tasks, including audit costs and trustee expenses. Compliance with the requirements of the Human Tissue Authority is included in governance.

Foreign Currencies

Transactions denominated in foreign currencies are recorded using the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated using the rate of exchange ruling at the balance sheet date. All exchange gains or losses are included in the statement of financial activities in the period to which they relate.

Research And Development Expenditure

Expenditure on research and development is written off to the statement of financial activities in the period in which it is incurred.

Tangible Fixed Assets

All tangible assets purchased costing more than £1,000 that have a useful economic life that exceeds one year are capitalised and classified as fixed assets, the exception being computer equipment, which is all capitalised, even if the cost is lower than £1,000. Tangible fixed assets are stated at historical cost less depreciation.

Depreciation is provided on all tangible fixed assets at rates calculated to write each asset down to its estimated residual value over its expected useful life, as follows:

Leasehold buildings	over the life of the lease
Leasehold improvements, fixtures & fittings	over 3 to 5 years
Motor vehicles	over 3 to 4 years
Office equipment	over 3 to 5 years
Laboratory equipment	over 3 to 5 years

Investments

Long term investments are classified as fixed assets, which are stated at market value in the Balance Sheet. Provision is made for any impairment in the value of fixed asset investments.

Stocks

Stocks are valued at the lower of cost and net realisable value. Net realisable value is based upon estimated selling price less further costs expected to be incurred to disposal. Provision is made for obsolete and slow-moving items.

Leased Assets And Obligations

Where assets are financed by leasing agreements that give rights approximating to ownership ("finance leases"), the assets are treated as if they had been purchased

outright. The amount capitalised is the present value of the minimum lease payments payable during the lease term. The corresponding leasing commitments are shown as obligations to the lessor.

Lease payments are treated as consisting of capital and interest elements, and the interest is charged to the statement of financial activities in proportion to the remaining balance outstanding.

All other leases are "operating leases" and the annual rentals are charged to the statement of financial activities on a straight line basis over the lease term.

Taxation

The company is a registered charity and as such its income and gains falling within Sections 471 to 489 of the Corporation Tax Act 2010 or Section 256 of the Taxation of Chargeable Gains Act 1992 are exempt from Corporation tax to the extent that they are applied to its charitable activities.

Pension Contributions

The group and the charity make contributions into defined contribution pension schemes on behalf of certain employees. The assets of the schemes are held separately from those of the group and the charity in independently administered funds. The amount charged to the statement of financial activities in respect of pension costs is the total contributions payable for the year.

Fund Accounting

The general fund comprises the accumulated surpluses of unrestricted incoming resources over resources expended, which are available for use in furtherance of the general objectives of the charity.

The investment revaluation reserve reflects gains or losses of the revaluation of the quoted investments.

Restricted funds are funds subject to specific conditions imposed by donors. The purpose and use of the restricted funds are set out in the notes to the accounts. Amounts unspent at the period end are carried forward in the balance sheet. Where the specific conditions of the donation are met so the funds are no longer restricted in purpose or use, unspent amounts are transferred to the general fund.

Provisions

Provision is made by the group and the charity for liabilities and charges arising from legal or constructive obligations that exist at the balance sheet date on the basis of the estimated cost to settle the present obligation or transfer it to a third party at that date. Consideration is given to the timing of the cash flows and to future events and uncertainties which may affect the amount required to settle the obligations.

The charity owns 100% of the issued share capital of Anthony Nolan Trading Limited ("ANTL"), a company registered in England. The charity acquired all of the 100 ordinary shares of £1 each that were issued in ANTL at par upon incorporation. These shares are carried in the balance sheet at their original

cost of £100, which the trustees believe approximately equates to their market value.

The principal activity of ANTL is to carry on the trading operations of the group with a view to raising funds on behalf of the parent charity, which is achieved through the sale of merchandise,

advertising, the organisation of fundraising events, and by exploiting intellectual property and other similar rights held by the parent charity. Annual financial statements for this subsidiary company are filed with the Registrar of Companies for England and Wales, and are publicly available.

Basis Of The Allocation Of Expenditure

Where appropriate, expenditure, including depreciation, is allocated directly to the activity to which that expenditure relates.

Expenditure which does not relate directly to an activity but are incurred to enable activities to occur are classified as support costs.

Support costs are apportioned to the activities they support on a reasonable, justifiable and consistent basis. The bases are:

- Finance and management costs relating to Governance are estimated based on the time and resources incurred on governance activities.

- Other finance costs are apportioned in proportion to total direct expenditure incurred per activity.

- All other support costs are apportioned in accordance with the full time equivalent number of staff directly employed in that activity.

A 10-MONTH-OLD BABY BOY HAS UNDERGONE A BONE MARROW TRANSPLANT AFTER A WORLDWIDE SEARCH

9: STAFF COSTS

For the 18 months ended 31 March 2013

	2013 (18 months)	2011 (12 months)
	No.	No.
The average monthly number of persons employed by the group during the period (excluding trustees) was:		
Charitable activities:		
Donor provision	157	133
Education and awareness	22	14
Research	21	20
Fundraising	30	33
Governance	3	3
	233	203
	£'000	£'000
Staff costs for the above:		
Wages and salaries	10,747	6,065
Social security costs	1,083	617
Pension costs	369	160
	12,199	6,842
Staff costs are allocated in the group's financial statements as follows:		
Donor provision	8,668	4,490
Education and awareness	1,335	542
Research	1,677	1,047
Fundraising	1,802	1,230
Governance	203	135
	13,685	7,444
The number of employees whose emoluments for the period fell within the following ranges was:	2013	2011
	No	No
£60,001 to £70,000	2	4
£70,001 to £80,000	3	-
£80,001 to £90,000	2	3
£90,001 to £100,000	2	1
£100,001 to £110,000	1	-
£120,001 to £130,000	1	1

Included in the allocated staff costs (note 7), in addition to payroll costs are the costs of funding academic positions of £191k (2011: £97k), staff benefit costs of £101k (2011: £73k), and agency staff and other similar costs of £1,133k (2011: £470k).

The group made contributions to money purchase pension schemes on behalf of all employees whose emoluments exceeded £60,000, and the total contributions payable during the 18 months' period amounted to £83k (12 months 2011: £37k).

During 2011/2013 the charity continued development work on upgrading the donor database system CORAL. £324k worth of software developers' staff costs was capitalised (2011: £126k), including £288k wages and salaries (2011: £113k), £33k of social security costs (2011: £12k) and £3k pension costs (2011: £1k).

10: NET MOVEMENT IN FUNDS

For the 18 months ended 31 March 2013

	2013	2011
	18 months	12 months
	£'000	£'000
Net movement in funds is stated after charging/(crediting):		
Depreciation and amounts written off tangible fixed assets:	673	302
Charge for the period - owned assets	609	267
Charge for the period - assets under finance lease	64	36
Research and development expenditure	2,225	1,414
Exchange losses on foreign currencies	-	52
Operating lease rentals:		
Land and buildings	409	316
Plant and machinery	29	82
Auditor's remuneration:		
Statutory Audit fees payable to		
Baker Tilly UK Audit LLP (Charity £24k (2011: £39k))	31	47
Tax Services payable to		
Baker Tilly Tax & Accounting Ltd:		
Compliance	1	3
Advisory	-	8
Other Services	49	-

The trustees neither received nor waived any emoluments for their services to the group or the charity, and were not reimbursed for any expenses incurred on behalf of the group or the charity during the current or previous years.

The group and the charity have an insurance policy that provides professional indemnity insurance cover for the trustees. The cost of this insurance for the period was £2k (2011: £2k).

During the 18 months to 31st March 2013, the group made net foreign exchange gains of £587k. In 2010/11, these were shown as gross gains of £171k and exchange losses of £52k.

11: TANGIBLE ASSETS

Provision for dilapidations	316	296	316	296

A provision for dilapidations is being carried in the balance sheets of the group and the charity in respect of the estimated costs of unavoidable reinstatement and refurbishment

works relating to certain leasehold properties that are currently occupied by the charity for its own use. This provision was created in 2004, added to in 2009 upon renewal of the

lease, and is now expected to be utilised at the earliest in the financial year 2013/2014.

Donor Campaign And Processing Fund: in 2011/2013 the charity received various grants to recruit and type to high resolution male donors aged between 16 and 30 years. The biggest contributors to this Fund were: Text Santa campaign in association with ITV (£913k), legacy from Mr Douglas Vincent Ellison (£233k) and The Jack Petchey Foundation (£230k).

Donor Provision fund: during the year various grants were received for the purposes of recruiting donors for the charity's registry.

As part of its commitment to increase the use of cord blood, Anthony Nolan has plans to open cord blood collection centres at a number of hospitals. Donations received to support this expansion programme are credited to the **Cord Blood Collection Centres Fund**. Expenditure incurred in opening the centres is charged to the Fund. The balance of the Fund represents donations received for the expenditure to be incurred in the 2013/14 financial year.

The Scientific Research Fund was set up in 2008/2009 to recognise income received annually in the form of a number of different grants awarded for specific research projects in immunogenetics and related fields. The cost of undertaking these research projects is allocated to the fund, with unspent monies being carried forward into 2013/2014.

Donations and grants received to fund the purchase of specific items of laboratory equipment for either research or histocompatibility laboratories are credited to the **Laboratory Equipment Fund**. When the specified asset is purchased and there is no on-going restriction over its use, the value of the asset is transferred to General Fund. £205k was transferred from Laboratory Equipment Fund to General Fund in 2011/13. The depreciation of the asset is charged to the General Fund over the life of the asset.

Funds are designated for the following purposes:

Donor Recruitment and Processing Fund: to allow for increased typing costs for donors recruited in the next 18 months.

Clinical trial coordination: to enable the organisation to coordinate a clinical trials group across the UK. To be utilised within the next 24 months.

The Investment Revaluation Reserve represents the difference between the historic cost of investments and their revalued amount at the balance sheet date.

24: PENSION COMMITMENTS

For the 18 months ended 31 March 2013

The group and the charity make contributions into defined contribution pension schemes on behalf of certain employees. The assets of the schemes are held separately from those of the group and the charity in independently administered funds. The amount charged to the statement of financial activities in respect of pension costs (as shown in note 9) is the total contribution payable for the period.

25: RELATED PARTY TRANSACTIONS

For the 18 months ended 31 March 2013

The charity has taken advantage of the exemptions provided by Financial Reporting Standard No.8: Related Party Disclosures, and has not disclosed transactions with fellow group undertakings on the basis that 100% of the voting rights are controlled within the group, and that group accounts are publicly available. There are no other related party transactions to be disclosed.
